SUNGAI CIUJUNG

Jalan Raya Jakarta Km 76  
Kragilan, Serang, Banten 42184

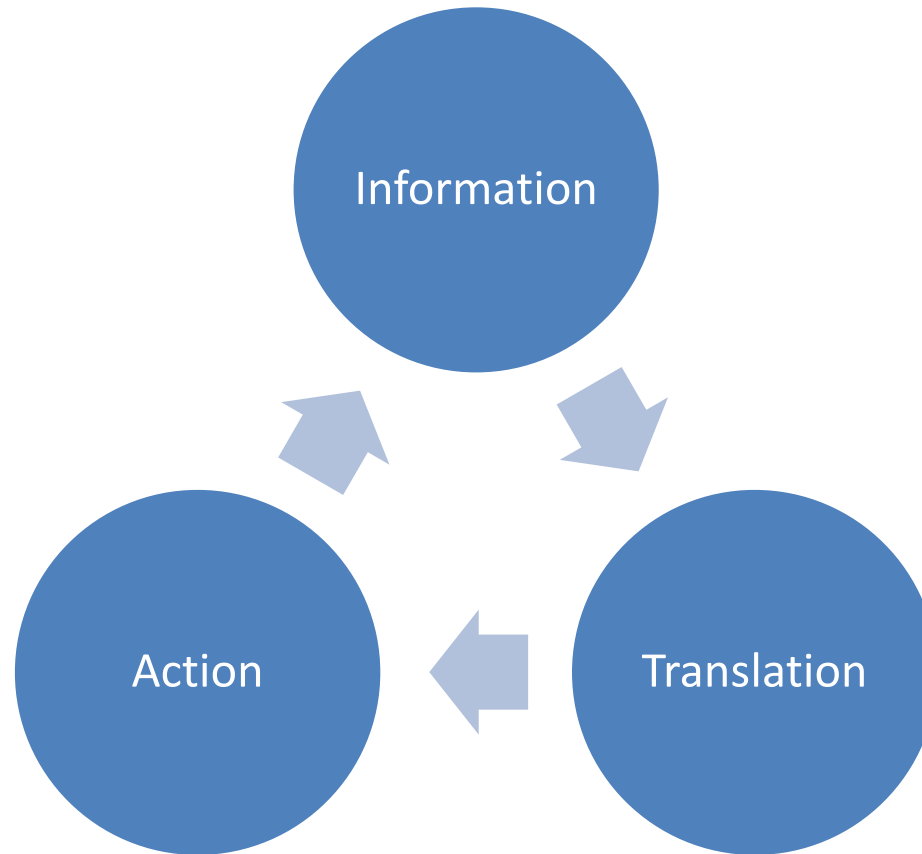

## Problem: Ciujung River contaminated

Why?	Pulp & paper company (and other smaller companies) dispose waste in the river.
How?	Authorities not effectively monitor and enforce law against companies. Companies continue to neglect compliance.

## Opportunities: Using right to information and participation to press government action

RTI	Access to public document on EIA; environmental audit; Ciujung River water quality monitoring; government decision/decreed etc.
Participation	(1) Involving communities to self-monitor water quality; formal complaint to gov agency; influencing multistakeholders (local parliament, gov agency); (2) legal action/lawsuit; (3) public campaign; media brief.
<i>Bridging RTI and participation</i>	Training/capacity building; information translation; community organizing; network consolidation.

## Assumed flow of actions

Creating more informed and stronger action
